Interview guide and survey design documents for grantee dissemination activity

Data Creators

Shirine Voller and Agnes Becker

Data Description

The IDEAS project sought to improve the health and survival of mothers and babies through generating evidence to inform policy and practice.

This data collection contains interview topic guides and supporting documents used in semi-structured face-to-face and phone interviews with members of organisations receiving Bill & Melinda Gates funding for projects in Ethiopia, India, and Nigeria (referred to as grantees). The interviews took place in November/December 2013 and again in October 2014-January 2015. Also included are design documents for a follow-on online survey of these projects in 2015 and the research impact framework used for analysis.

Data Collection Methods

Semi-structured interviews were conducted with up to two key informants from foundation-funded maternal and newborn health projects that had ended, or were nearing completion. The interviews and document review took place in November and December 2013 with the following projects: From Ethiopia, Last 10 Kilometers (L10K), the Maternal and Newborn Health in Ethiopia Partnership (MaNHEP) and Saving Newborn Lives (SNL); From India, Manthan and Sure Start; and from Nigeria, Society for Family Health. A follow up study was conducted between October 2014 and January 2015. Representatives of Better Birth, the Uttar Pradesh Community Mobilization Project, and the Strengthening MNCH Frontline Worker Organizations project, Nigeria, were interviewed. An online survey was sent to projects that had been included in the first round of data collection.

Geographic regions

Ethiopia, India, and Nigeria

Key dates

Interviews took place in November-December 2013 and October 2014-January 2015. Follow-on online survey performed in 2015.

Species:

Human population

Ethics

Ethics approval obtained from the London School of Hygiene & Tropical Medicine ethics committee.

Keywords

Maternal health, Newborn health, IDEAS, Mothers, Babies, Ethiopia, India, Nigeria, Grantee dissemination activities

Language of written material

English

Project Information

Project

IDEAS - Informed Decisions for Actions in Maternal and Newborn Health

Funder/Sponsor

Bill & Melinda Gates Foundation.

Grant Number

OPP1017031
