

IDEAS project

Study of the scale-up of innovations to improve maternal and newborn health

DOI

<http://dx.doi.org/10.17037/DATA.110>

Data Creators

The names of LSHTM & non-LSHTM staff/students responsible for the data's creation who should be included in a citation.

Data Description

The IDEAS project sought to improve the health and survival of mothers and babies through generating evidence to inform policy and practice. This data collection contains resources produced for a qualitative study which explored how innovations to maternal and newborn health improvement can be scaled-up in Ethiopia, northeast Nigeria and the State of Uttar Pradesh, in India, and any catalysts and barriers that exist. It contains a research protocol, interview topic guides, a qualitative code sheet and associated content forms.

Data Collection Methods

Semi-structured interviews were conducted with 150 key informants (50 each for scale-up in Ethiopia, northeast Nigeria and Uttar Pradesh India). These interviewees were purposively selected for their experience or expertise in scaling up health innovations originally funded by external donors.

Geographic regions

Ethiopia, northeast Nigeria and the State of Uttar Pradesh in India.

Key dates

Interviews performed between May 2012 - April 2013.

Species:

Human population

Ethics

Approval obtained from the London School of Hygiene & Tropical Medicine ethics committee.

Keywords

scale-up, maternal health, newborn health, Ethiopia, India, Nigeria

Language of written material

English

IDEAS project - Study of the scale-up of innovations to improve maternal and newborn health

Project

IDEAS – Informed Decisions for Actions to Improve Maternal and Newborn Health

Funder/Sponsor

Bill & Melinda Gates Foundation

Grant Number

OPP1017031
