Variable	Type	Codes	Description
id	numeric	number	Participant identifier
age	numeric	number	Participant age (years)
sex	categorical	1 = male 2 = female	Participant sex
testb4	categorical	1 = yes 2 = no Blank = not collected	Ever tested for HIV before?
resb4	categorical	1 = positive 2 = negative 3 = not applicable (never tested before) 4 = Not disclosed Blank = not collected	Previous HIV test result
detn	categorical	1 = positive 0 = negative	Optimally-stored Determine result
deth	categorical	1 = positive 0 = negative	Sub-optimally-stored Determine result
unign	categorical	1 = positive 0 = negative	Optimally-stored Uni-Gold result
unigh	categorical	1 = positive 0 = negative	Sub-optimally-stored Uni-Gold result
oqn	categorical	1 = positive 0 = negative	Optimally-stored OraQuick result
oqh	categorical	1 = positive 0 = negative	Sub-optimally-stored OraQuick result
golds	categorical	1 = positive 0 = negative Blank = not collected on original variable	Diagnostic reference standard result , given to participant as final result
changed	categorical	1 = yes 0 = no Blank = not collected on original variable	Indicator if optimally-stored OraQuick changed over 12 months of re-reading
changedh	categorical	1 = yes 0 = no	Indicator if sub-optimally-stored OraQuick changed over 12 months of re-reading
