

LSHTM_COVID-19_Survey

Thank you for agreeing to take part in this survey, which is being carried out by researchers from the **London School of Hygiene & Tropical Medicine (LSHTM)**.

We are asking people to take part in our research in order to help us to understand how COVID-19 has affected the health and attitudes of people living in the UK.

In this survey we will ask you to answer a series of questions, some of which focus on you and how your health behaviours may have changed over the last few months. Other questions are about what you've done if you had COVID-19 in your household, and about how you feel about what has been going on in the UK during the pandemic.

This study is anonymous, which means that we will neither know who you are, nor keep any information about your precise location.

Some of the questions cover topics of a personal nature, but you will be able to skip any questions that you do not wish to answer. Please answer all questions as accurately as possible, keeping in mind that the study team will have no way to identify you.

####About This Study

- The survey will take around 20 minutes to complete
- The red line at the top of the screen shows your progress through the survey
- This research has received approval from the research ethics committees of LSHTM (Reference 21846) and the World Health Organization (Reference CERC 0039)
- The anonymous data from this survey will be shared publicly
- The scientists leading this work are Dr Shelley Lees and Dr Chrissy Roberts
- The results of the study will be available [here](<https://chrissyhroberts.github.io/csedk/>)

Please **DO NOT** press the back button on your phone or browser until you have submitted the survey

- Relevant when:
Always relevant.

[agree] [acknowledge]

####To take part in this study, please confirm that you

- live in the United Kingdom
- are aged 18 years or older
- have read the information on the previous page
- understand that all data will be anonymous
- understand that the data from this survey will be shared publicly
