

Baseline caregiver survey

NOTE: This survey formed part of the baseline coverage survey questionnaire. Caregivers of eligible children (children aged 24-47 months at the time of the survey) were asked to complete the caregiver survey. The demographic data are drawn from the coverage survey questionnaire.

NOTE: Demographic questions that form part of the vaccination coverage survey were collected in line with the following WHO guidance: *World Health Organization Vaccination Coverage Cluster Surveys: Reference Manual (2021)*: [World Health Organization Vaccination Coverage Cluster Surveys: Reference Manual](#)

Demographic variables

caregiver_uid	Unique identifier for each child
region_full	Region full name
district_full	District full name
cluster_number	Cluster number
cluster_full	Cluster full name
cluster_weight	Cluster weight
sex_respondent	Sex of respondent (note: Respondent sex could not be determined directly for all observations because of a data collection/programming error affecting respondent identification. A proxy variable was therefore reconstructed using information from the household roster and respondent identifiers. Where respondent sex could not be determined with sufficient confidence from the available data, the value was coded as " Unknown ". As a result, this variable contains a relatively large proportion of " Unknown " values and should be interpreted accordingly.
caregiver	Is the respondent a 'caregiver'; defined as someone who has decisional authority (alone or shared) over the vaccination of their child based on the response to kpi_6 (i.e. responding either 1 [I make the decision on my own], 2 [I make the decision together with my spouse/partner] or 3 [I make the decision together with other family members (e.g. in-laws, elders)])

Variable descriptions

Data represent the beliefs/experience/intention of the caregiver on the day of data collection (July/August 2025).

Variable	Description
kpi_1	How important is vaccination for your child's wellbeing?
kpi_2	Do you support the use of vaccination and child health services for children in your community?
kpi_3	In the past 3 years, have you actively sought vaccination services for your child?
kpi_4a	To what extent do you agree with this statement: "The health care provider treats me and my child in a friendly and courteous manner when we attend recent vaccination services"
kpi_4b	How satisfied are you with the vaccination services you received recently?
kpi_5	Do you plan to take your child to complete his/her routine vaccinations?
kpi_6	Who usually makes the decision about whether, when, and where your child receives vaccinations?
