# *Objectives of this session*

After the completion of the session, the participants will be able to:

- Explain the functions of CCTV camera
- Understand the process and be able to extract observation data from filmed clinical events
- Ensure the overall functioning of CCTV video recording

# *Closed-Circuit Television (CCTV)*

- Closed-Circuit television (CCTV) is also known as video surveillance, is the use of video cameras to transmit a signal to a specific place, on a limited set of monitors.

# *Materials required in CCTV Cameras installation*

- CCTV Cameras
- Monitor
- Wire
- Recorder
- Hard drive
- Mouse

How does the CCTV camera functions?

# *Ensure the overall functioning of CCTV video recording*

- Check the quality of video whether the video is clear or not.
- Ensure the video is being recorded
- Keep the back up by extracting the record everyday in the hard drive safely.
- Clean the lens time to time for better quality of video.
- Be sure to keep video records safely and maintain confidentiality
- Share the video records only to authorized person in team

# *Definition of Procedures to be monitored via film observation*

- Stimulation by rubbing the back vigorously
- Suctioning nose/mouth
- Bag and Mask ventilation
- Oxygen Supply
- Endotracheal Intubation
- Chest compression
- Gasping

# *Group Discussion*

Please review the observer checklist in small groups of 3-5.

In your groups discuss:

- Any questions?
- Any clinical content you are unsure of?
- Any issues?
- Possible solutions?
